Education

Texas A&M University **College Station, TX**
B.S. Industrial and Systems Engineering, College of Engineering *May 2028*
Engineering Honors; Minor in Statistics; GPA: 3.44/4.00
Integrated M.S. Finance (in progress), Mays Business School

Experience

Co-Founder **Dec. 2025 – May 2026**
ClinicalHours *College Station, TX*

- Co-founded ClinicalHours, a free-clinic volunteer SaaS: **700+** students, top **10%** of YC applicants, Meloy Accelerator.
- Owned the product roadmap and requirements from customer discovery interviews with clinic admins and students: one role-based intake, review, and onboarding workflow replacing manual staff coordination; **$750–$1,250** pricing.
- Secured and launched the first pilot with BCS Free Health Clinic: **150+** applications, volume up **325%**, recruiting time down **50%** vs. its manual process; sourced **50+** more clinic leads with AI outreach tooling.
- Owned go-to-market: analyzed signup, referral, and retention data in Supabase with SQL; shifted marketing to pre-health orgs and peer referrals, adding **300** users in **2** weeks after **400** in the first **2.5** months.
- Shipped the full product with agentic coding tools (Claude Code, Codex) on a Supabase backend, designing reusable React components for student and admin portals: applications, review, scheduling, and hours.

Software Engineering Intern **June 2026 – Aug. 2026**
Matic (Part-time) *Plano, TX*

- Ran product discovery and requirements gathering with physicians and engineers in cross-functional Agile sprints; wrote user stories and acceptance criteria; drafts reached **90%** first-pass physician approval.
- Owned PulseMatic end to end: an AI inbox used and tested by physicians that automates **50–100** daily clinical tasks (refills, labs, chart updates), saving about **90** min/day; built into Matic's flagship product, Provider AI.
- Chose RAG retrieval over full-chart prompts as a speed/cost trade-off, cutting latency **64%** and token costs **82%**.
- Set release gates: GCP Cloud Run CI/CD with automated accuracy checks routing risky drafts to physician review.

Business Insights Intern **June 2026 – Aug. 2026**
Legends Global (Part-time) *Frisco, TX*

- Led market and competitor research for AT&T Stadium and the Dallas Cowboys, benchmarking **1,400+** SKUs against peer NFL venue sales data and DFW fan demographics; recommended new F&B concepts to venue leadership.
- Modeled price elasticity for **1,400+** SKUs in Databricks SQL, projecting a **$3.6M** annual uplift over current pricing; designed a fan-friendly pricing pilot using sales heatmaps, forecasting **12%** higher per-capita spend.
- Built a menu optimization platform for **400+** venues, using a graph-based agentic workflow to route SKUs across **10** behavioral merchandising strategies that set item placement, sizing, and menu-board layout.
- Standardized KPI/OKR targets and performance reporting for **400+** venues in one tracking dashboard; built PowerPoint decks and presented pricing and assortment recommendations to venue and F&B stakeholders.

Projects

Velo | *Aggies Invent – 3rd Overall, Most Feasible Solution* **Sep. 2026**

- Prototyped an AI tool that flags policy changes across **495** Pantex documents and proposes source-cited edits.
- Planned and prioritized policy edits by operational impact and risk of delay across **43** federal orders; cut modeled review time **78%** vs. manual review and token use **98%** vs. full-document prompts; team won **$1,500**.

Clara | *AI Voice Intake for Clinical Workflows* **Hackathon Project**

- Designed Clara, an AI voice intake that turns pre-visit patient conversations into structured clinical data.
- Mapped the clinician pre-visit workflow and built a working prototype that drafts summaries for clinician review.

Awards

Problems Worth Solving Challenge (Honorable Mention) | Aggies Invent (3rd Overall, Most Feasible) | Good Bull Pitch (3rd) | Meloy Bullet Pitch (3rd/60) | Product@TAMU (2nd Ideathon; 3rd JPMorgan Redesign) | Texas A&M Ideas Challenge (Finalist)

Skills

Product & Program: Product Strategy, Roadmapping, Customer Discovery, User Stories, Agile (Scrum, Jira), GTM, CRM
Technical: SQL, Python, Databricks, Excel, PowerPoint, Tableau, Power BI, Statistics, A/B Testing, RAG, HIPAA/PHI
