EDUCATION

Texas A&M University

Aug. 2025 – May 2029

B.S. Industrial & Systems Engineering (Honors), Minors in CS & Statistics

College Station, TX

- **Organizations:** EH EDGE, Aggie Venture Fund, FREE, Aggie Innovators

EXPERIENCE

Software Engineering Intern

June 2026 – Present

Matic

Plano, TX

- Built **PulseMatic**, a PHI-secure AI agentic product saving physicians **90 min/day** across **50–100** inbox tasks.
- Translated physician inbox workflows into a RAG and Google ADK agentic pipeline, grounding drafts in athenaOne context to achieve **85%** first-draft approval and cut generation latency by **64%**.
- Integrated **PulseMatic** into **Provider AI**, Matic's flagship AI layer for EHRs, defining reusable workflows, safety controls, and shared UI/API components to accelerate customer deployments and enable scalable upsells.

Business Intelligence Intern

June 2026 – Present

Legends Global

Frisco, TX

- Conducted **Databricks SQL** analyses across order- and item-level SalesDW tables, reconciling revenue, units, transactions, and AOV across **50,000+** transactions to identify SKU pricing strategies.
- Developed an AT&T Stadium fan-friendly pricing strategy pilot using heatmaps, DFW demographics, **1,400+** SKUs, and **10+ NFL** benchmarks to target SKUs and stands, forecasting **12%** higher per-cap spend.
- Standardized OKR/KPI planning and performance reporting across **400+ venues** using a Claude dashboard.

Co-Founder

Dec. 2025 – Present

ClinicalHours

College Station, TX

- Launched a clinic volunteer management SaaS for intake, scheduling, messaging, and admin workflows.
- Secured first clinic partner and grew to **600+** student users through onboarding and campus adoption.
- Handled **150+** applications, cut recruiting time by **50%**, and increased application volume by **325%**.
- Built internal AI-led sales tools with Claude, Gmail API/MCP, and scraping to source **50+** clinic leads.
- Placed **3rd/60** in Meloy Bullet Pitch, **3rd** in Good Bull Pitch, and named Ideas Challenge finalists.

PROJECTS

FinSeek | TAMUHack (Capital One Challenge)

Jan. 2026

- Built a fraud detection platform for TAMUHack's Capital One challenge using a **3-model** soft-vote ensemble.
- Stacked XGBoost, LightGBM, and logistic regression on **200k+** PaySim transactions; SHAP for feature analysis.
- Per-model threshold tuning hit **95%+** precision; cut false positives by **99%** vs. default classifier.

Clara | Product@TAMU Ideathon

Apr. 2026

- Built an AI clinical intake system with a Twilio-to-GPT-4o mini pipeline for SOAP notes and entity extraction.
- Projected **4.5 min** reduction in intake time through automated pre-visit data collection and flag detection.
- Conducted user research with clinic staff to map intake pain points and define core feature requirements.

AWARDS

Meloy Bullet Pitch (3rd Place, April 2026) | **Good Bull Pitch** (3rd Place, March 2026) | **Texas A&M Ideas Challenge** (Finalist, March 2026) | **Product@TAMU Ideathon – Persona** (2nd Place, Nov. 2025)

SKILLS

Development: OpenAI Platform, Microsoft Azure, Google Cloud Platform, Langchain, Firebase, Supabase, Git, Docker, Agile Workflows, Linear

Analytics: Databricks, Tableau, Excel/VBA, Pandas, SQL, Vensim
