Education

Texas A&M University

M.S. Finance

Mays Business School

College Station, TX

May 2030

Texas A&M University

B.S. Industrial & Systems Engineering, Minor in Statistics

College of Engineering – Honors Program

College Station, TX

May 2029

Experience

Software Engineering Intern

June 2026 – Aug. 2026

Matic

Plano, TX

- Built and shipped **PulseMatic**, an AI agentic product on **Google Cloud Platform (GCP)** for medical inbox management, saving physicians **90 min/day** across **50–100** daily tasks.
- Architected a **RAG and Google ADK agentic pipeline** over athenaOne data, achieving **95%** first-draft approval while cutting generation latency by **75%**.
- Productized PulseMatic for integration into **Provider AI**, Matic's flagship AI layer for EHRs, defining reusable workflows, safety controls, and shared UI/API components for scalable deployments.

Business Insights Intern

June 2026 – Aug. 2026

Legends Global

Frisco, TX

- Led a product gap analysis for **AT&T Stadium**, combining SKU performance, competitive benchmarks, and local demand to identify menu whitespace and recommend new F&B concepts and assortment strategy.
- Built a scalable menu optimization platform for **400+ venues**, combining SKU sales rankings with a **graph-based agentic workflow** that routed products across **10 strategies** to determine menu placement and presentation.
- Developed a repeatable **price-elasticity framework** in **Databricks** to identify SKUs where targeted price reductions could increase demand, revenue, and contribution profit across a **400+ venue** portfolio.

Undergraduate Researcher

Jan 2026 – May 2026

Texas A&M University

College Station, TX

- Built a decision-support dashboard modeling cattle production economics across **65 inputs** and **6 cost categories** to quantify profitability and futures exposure.
- Developed walk-forward **SARIMA and ensemble forecasting models** for CME cattle futures, achieving approximately **0.97 R^2** on historical predictions.

Projects

ClinicalHours | *Healthcare SaaS Startup*

- Co-founded a clinic volunteer-management SaaS with its first clinic partner, reaching **700+ student users**.
- Owned clinic partnerships, pricing, and go-to-market strategy, using customer discovery to guide product development, sales positioning, and expansion into new clinic partners.
- Processed **150+ applications**, cutting recruiting time **50%** and increasing application volume **325%**.
- Won multiple competitions, including **Meloy Bullet Pitch** (3rd/60), **Good Bull Pitch** (\$200), **Ideas Challenge** (Finalist), and joined the **Meloy Launch Accelerator** (\$500).

Temper | *Autonomous AI Options-Trading Platform*

- Built **3 autonomous options-trading tool-based agents** using **Claude API** and **10+ custom tools** to analyze trading performance, review strategy, and autonomously adjust configurations.
- Designed the **Postgres/Supabase** data architecture linking trades, signals, and strategy versions, with scheduled execution and API optimizations that reduced dashboard cold-load latency **5x**.

Awards

Meloy Bullet Pitch (3rd/60, April 2026) | **Good Bull Pitch** (3rd Place, March 2026) | **Texas A&M Ideas Challenge** (Finalist, March 2026) | **Product@TAMU Ideathon – Persona** (2nd Place, Nov. 2025)

Skills

Technical: Python, RAG, GCP, Azure, Databricks SQL, Git, Docker, RAG, LLMs, REST APIs, MCP

Organizations: Aggie Venture Fund, Enhancing Development of Global Engineers, Freshman Reaching Excellence in Engineering
